Vrushali Vishnu Alugade

Front end Developer | Agentic AI | Research Prototyping

Personal Info

Email
vrush02cc@gmail.com
Address
Kaiserslautern 67663, Germany
Phone
+49 1748433772

Skills

Languages: Java, Python, JavaScript, SQL
Frontend: React.js(Webpack & ViteJs), UI5 React, Next.js, AngularJS, HTML5/CSS3
AI & Developer tools: SAP BTP, AI Core SDK,LangChain, LangGraph, Claude Code, Cline
Backend & APIs: Node.js, FastAPI, REST API
Databases: MongoDB, NoSQL, PostgreSQL
Integrations: REST/SOAP APIs, external systems, data migration
IDEs: VSCode, Eclipse, IntelliJ
DevOps & Tools: Git, CI/CD, Jenkins, Bitbucket, Linux, Agile/Scrum, Jira

Versatile Developer with 4.5+ years of experience building AI-driven user interface, enterprise software, and research prototypes at SAP, Accenture, and TCS. Currently developing AI Agent Research applications at SAP, leveraging agentic AI, AI-assisted development, and modern web technologies to translate emerging ideas into practical solutions. Passionate about rapid prototyping, innovation, and bridging research with real-world applications.

Education

10/2022 - 03/2026
MSc. Informatik Major : Software Engineering Minor : Intelligent Systems
RPTU Kaiserslautern

07/2015 - 07/2019
Bachelor of Engineering Major : Computer Engineering
University of Mumbai

Professional Experience

05/2026 - present
Front End Developer for AI Agent Research
SAP (R&I Autonomous AI Research), Walldorf

- Developing user-facing AI research applications using SAP UI5 Web Components for React, integrating backend APIs and AI services.
- Developing the SAP-Giotto.ai collaboration website, implementing the frontend and refining content & design with the UX designer & manager.
- Investigate agent reliability: tool-call failures, iteration limits, context management, and termination.
- Support open-weight model PoCs under researcher guidance, testing models locally and contributing SAP AI Core deployment scripts.
- Building MCP servers enabling AI agents to access SAP's process catalogue in Databricks and translate agent requests into S/4HANA Cloud OData URLs via the Business Knowledge Graph.

10/2024 - 05/2026
Working Student Frontend Developer
SAP (Quantum Exploration), Walldorf

- Developed and enhanced UI features for quantum computing demonstrators covering Time Series Forecasting and Synthetic Data Generation, improving existing code and interface usability.
- Supported AI agent research by investigating agent behavior and contributing to PoCs for different frameworks to assess their technical feasibility and applicability.

02/2023 - 08/2023
Working Student UI Developer
RPTU Kaiserslautern, Kaiserslautern

- Contributed to UI development using Kotlin, enhancing features like drag-and-drop and dynamic cell shifting.
- Resolved multiple bugs to improve overall SysMD tool performance.

11/2021 - 10/2022
Application Developer
Accenture Pvt Ltd, India

- Translated business requirements into scalable Salesforce solutions, utilizing Lightning Web Components, Apex Classes, and Visualforce Pages to enhance user productivity by 40%.
- Partnered with cross-functional stakeholders to gather and refine CRM requirements, aligning system workflows with business goals and user journeys.
- Conducted code quality checks and post-deployment reviews, reducing security and compliance issues by 50%.
- Leveraged CI/CD tools (Bitbucket, Jenkins) for seamless deployment and agile release cycles, ensuring smooth transition across development

Soft Skills

Strong ability to quickly adapt to new technologies, frameworks, and development environments.
Skilled in creating technical documentation, including impact analysis, implementation plans, and user training materials.
Proven track record in troubleshooting, debugging, and production support.
Effective at managing multiple tasks in agile teams while maintaining high quality and reliability.

Certificates

07/2025

Generative AI for Everyone (DeepLearning.AI)

07/2018

Oracle Certified Java Associate Programmer

12/2017

Angular Js & Bootstrap Core - Fundamentals

07/2017

Web Technologist Level 1

Awards

12/2022

Nikohack Winner

03/2024

Start HACK Participant - Switzerland

03/2018

Smart India Hackathon Finalist

Languages

English - C1
Deutsch (B1 ongoing) - A2

Publications

Co-authored and presented “System for Full Immunization Coverage” at ICDSM 2021; published in Springer’s Advances in Decision Science and Management proceedings.(ICDSM 2021)’ (ISBN 978-981-16-5685-9).

stages.

08/2019
- 11/2021

Application Developer

Tata Consultancy Services, India

- Developed Salesforce workflows and external integrations to automate lead generation and streamline the telecom customer lifecycle from lead capture through opportunity creation, order processing and service activation.
- Implemented REST API-based CRUD operations on a PL/SQL backend, called directly from the Salesforce by scheduling a batch process.
- Automated telecom number-management requests through Salesforce using REST APIs eliminating 3-4 operations tickets per day.
- Developed Salesforce to CloudSense CPQ products through field mapping, configuration and Lightning components.
- Contributed to migrating nearly 100,000 customer services from Salesforce to CloudSense CPQ within a Project that cut order processing from two days to 30 minutes during pandemic.
- Developed and maintained Apex test classes and performed code quality checks to support reliable deployments and release validation.

Projects

08/2026
- 08/2026

Developer - AI Research Automation

AI Agent Research Digest — Personal Project (Prototype)

- Built an experimental workflow integrating Hacker News and arXiv APIs, with JavaScript-based recency filtering and persistent tracking to prevent repeated items.
- Integrated LLM summarization, Markdown-to-HTML conversion, and scheduled email delivery to generate a technical research digest.

10/2024
- 03/2025

Master’s Thesis Student DFKI Kaiserslautern

Master’s Thesis - M2M Transformation from SysML Model to AAS Models

- Learned ATL and implemented rule-based M2M transformations from SysML state machine models to AAS models using EMF/Ecore.
- Developed a subsequent model-to-text (M2T) transformation workflow using Python, FastAPI, and Uvicorn to generate AAS JSON representations.
- Designed transformation code to support future extension to other UML/SysML diagram types; validated source models and tested generated outputs against IDTA specifications.

11/2023
- 03/2024

UI Developer

'View' feature development in SysMD Notebook

- Developed a “View” dropdown feature in SysMD using Kotlin to render notebook-defined packages and classes as class diagrams.
- Enabled users to visualize the internal model generated by the “Analyze” action directly in a notebook cell by selecting “View” and specifying the package namespace.
